

PLEDGE TO GO STRAWLESS IN APRIL

I pledge to go strawless for the month of April (Earth Month) because I don't really need to use a single-use disposable plastic straw that'll last over 2,000 years. If I must, I will use a reusable straw or reuse one plastic straw the whole month. I care about our environment, and don't want to contribute to the 500 million straws going to the landfill every day. Plus, hurting sea creatures sucks.

How to Go Strawless:

- Carry a reusable straw
- Refuse straws
- Ask for no straw with your drink
- Choose a beverage that does not require a straw
